Three Dimensional Window Block Tutorial

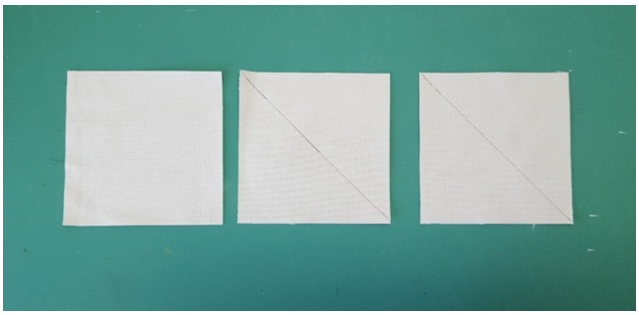
Based on the Three Dimensional Window quilt block tutorial by Zen Chic

on YouTube https://www.youtube.com/watch?v=4Fyl4iz665Q

Cutting Directions:

- From the grey background fabric:

Cut 3 squares @ 4 in. x 4 in.

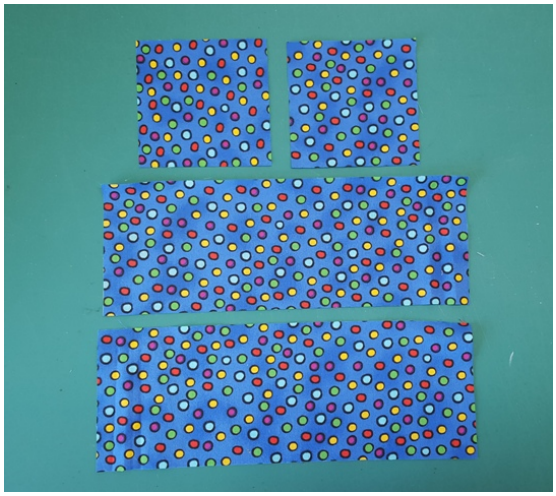


Mark a diagonal line from one corner to the other, as shown, on 2 of the grey squares.

- From a blue fabric:

Cut 2 squares @ 4 in. x 4 in.

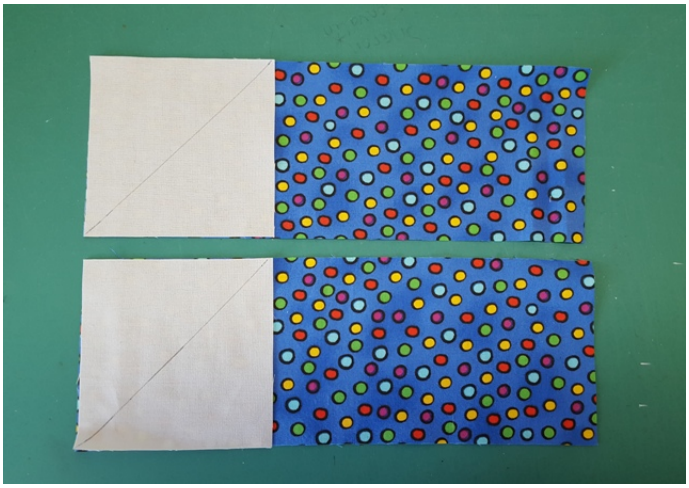
Cut 2 rectangles @ 4 in. x 11 in.



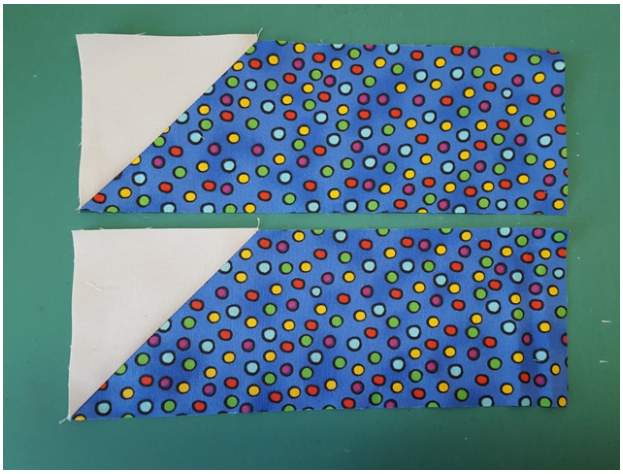
<u>Sewing Directions</u>:

Sew the two blue squares to the unmarked grey square. Press the seam allowances toward the blue fabric squares.

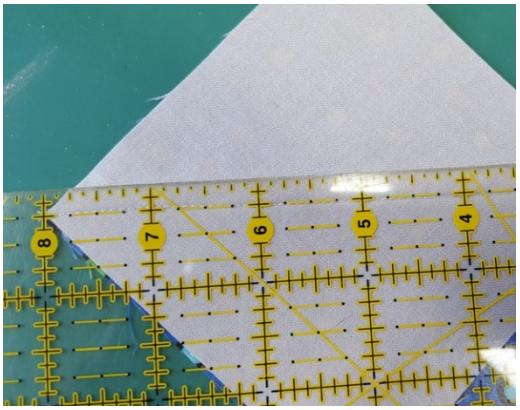
Place the two marked grey squares on top of the two blue 4” x 11” strips, making sure that the marked lines are the same as in the photo:



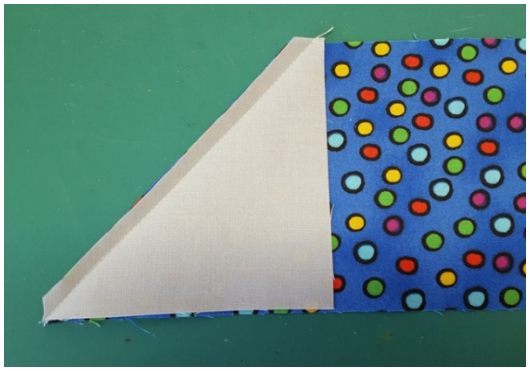
Sew along these lines, then press the corner back to match the opposite corner (“Sew and Flip”), as shown below.



Open the square again and carefully trim a ¼ inch seam allowance, cutting off the extra grey and blue fabrics.

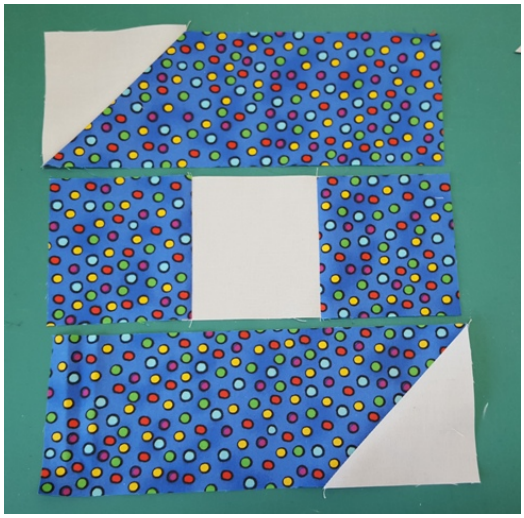


After trimming, your unit should look like this:

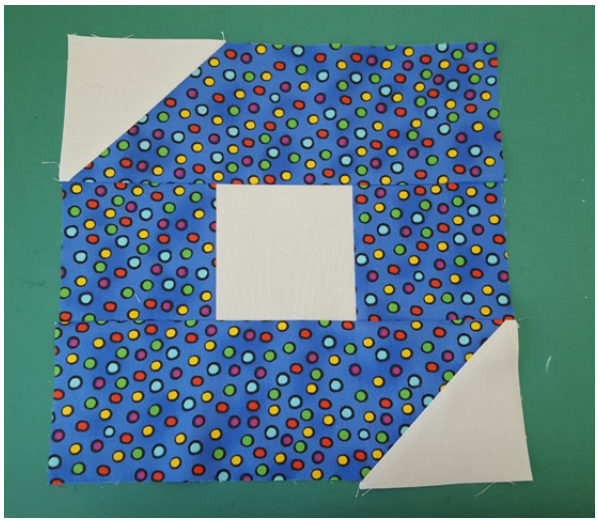


Re-press the triangle into position.

Lay out the sewn units like the photo:



Sew the units together, using a ¼“ seam allowance, then press the seam allowances toward the blue rectangles.



Your finished block should measure 11 inches, raw edge to raw edge, to finish at 10 ½ inches square.

Ta Da! A finished “Three Dimensional Window” block!
